Poem

Precious Water

Written by -

ANURAG KRISHN

Water – water precious,

But less cost.

Neither serious,

Nor harmful.

But needed

To digest food.

Tree has strong root

Also, the shoot and the wood.

It’s needed

To make food,

Also, to digest

The food.

Water neither be

Destroyed, nor

Be discovered.

It's recycle process,

It's Begger's lover.

Green nature is water,

Hungry man taste is water,

Bird's stamina is water,

Waterfall beauty is water.

Volcano calmness is water,

World stamina is water.

However, nature is cruel and ugly,

Without precious water.
